Diablo Tarper System

Diablo Tarper Features:

- Ultra lightweight, fully adjustable tarper
- Covers 10-40 cubic yard containers without roller extending past rear of container
- Roller can be place in cradle, on rear edge of container, or on frame rails of truck
- All arm tubing is Grade A5 for structural sequencing
- All pivot points utilize a self lubricating fiber bushing for proper arm lubrication and maintenance
- No valving required for proper arm sequencing
- Rotary actuators are a totally enclosed gear pivot assembly, the gears are in a constant oil bath can rotate 180 degrees and are phase opposed
