Pioneer Tarper Systems-IN STOCK & Ready To Go To Work

TUFF-TARPER

pioneer cover-all

PIONEER-HR1500H PIONEER-HR1500HAL (Hydraulic Gantry)

Features

- utilizes the truck's existing hydraulic system and is powered by a right angle direct-drive motor/gearbox combination
- roller assembly is mounted on a hydraulically powered adjustable gantry that moves vertically from 60-96"
- as the tarp is deployed, the torsion-spring powered pivot arms move to cover the load as the hydraulic motor unwinds the cover from the roller
- standard pivot arm framework is constructed from Heavy Duty Steel Tubing (Pioneer-HR1500E) but is also available with a Heavy Duty Aluminum framework (HR1500HAL)
- standard tarp is 9' wide Expandable Heavy Duty mesh

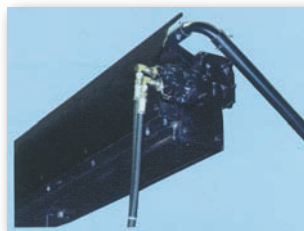

Recommended for single axle hook lifts and cable hoists covering fixed height containers from 8-16' in length.

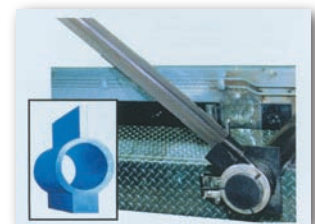

- Hydraulic Gantry
- Moves vertically from 60-96" to accommodate various size containers

- Flow diverter, PRV and cover control valve
- Operation is low pressure for safety

- Direct-Drive Hydraulic Motor
- Provides quiet smooth and steady gear movement

- Heavy Duty Low Arm (Aluminum)
- 3-1/8" extruded aluminum optional
- Integral set screw for quick easy arm replacement
