Pioneer Tarper Systems-IN STOCK & Ready To Go To Work

TUFF-TARPER

pioneer cover-all

PIONEER-HR1500E PIONEER-HR1500EAL (Electric Direct Drive)

Features

- powered by a 12VDC direct drive right angle electric gear motor that provides steady and quiet rotation of the roller assembly-which is mounted on top of a stationary gantry
- as the tarp is deployed, the torsion spring-powered pivot arms move to cover the load as the electric motor unwinds the cover from the roller
- standard pivot arm framework is constructed from Heavy Duty Steel Tubing (Pioneer-HR1500E) but is also available with a Heavy Duty Aluminum framework (Pioneer-HR1500EAL)
- standard tarp is 9' wide Expandable Heavy Duty mesh

Recommended for single axle hook lifts and cable hoists covering fixed height containers from 8-16' in length.

- Fixed length roll rest with 12 or 24v right angle electric direct drive gear motor-ideal for transporting one-size containers.

- 2-Way Electrical Switch Powers the system to cover & uncover containers

- Heavy Duty Reverse Wound Torsion Spring
- Standard-electric and hydraulic units

- Heavy Duty Low Arm (Steel)
- 1-5/8" steel tubing (standard). Integral set screws for quick easy arm replacement
