MODEL TL3 "THE LOCKER": CONTAINER LOCKING SYSTEM

Save time and effort with the Locker. With the touch of a handle, The Locker aligns and locks-in commercial containers for quicker and safer pick-ups. The Locker's safety valves prevent the winch or kick-bar from operating until the locker is closed, and the container secured, increasing operator safety. The patented Locker is offered exclusively by Perkins.

Features and Benefits

Protect your operators with the best container locking system on the market, the TL3 The Locker, from Perkins, your trusted name in lifters for over 30 years.

- ◆ Conveniently locks both sides of commercial container, saving time and effort
- ◆ Powerful cylinders draw misaligned containers into the locking area, saving the operator from having to reposition the truck or container.
- ◆ Lightweight design adds 200lbs to the truck's weight, keeping fuel costs low
- ◆ Unobtrusive design stays out of the way for hand loading or other tasks
- ◆ Works with or without a cart lifter
- ◆ Installs on virtually any rearloader
- ◆ ISO 9001 manufacturer
- ◆ National Service technicians for product support
- ◆ Fully staffed engineering department for custom applications

Specifications

- Fully compatible to ANSI Type T commercial bins up to 10 yards
- Operates on a single spool hand valve.
- Hydraulic operated lock valves prevent operation of winch and kick bar unless The Locker is closed, ensuring safe lifting
- 4 second cycle time @ 4 GPM
- 1" thick steel lock plates
- 1" thick main pivot pin
- PO check valves protect against blown hoses
- Hydraulic Tap-in kit sold separately
- 1 year limited warranty
